

**THE QUEEN'S
HEALTH SYSTEMS**

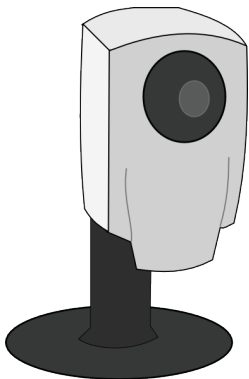

Medical Record Photo Update

What:

We are implementing a new process to take a current, real-time photo to add to your medical record. This photo will be visible at all of our facilities and will be loaded in addition to the required copy of your photo ID.

This photo is considered protected health information and will not be stored on a device or shared without your permission.

Why:

Adding a photo to your medical record helps us to:

- **Increase patient safety**— it adds another way to identify you during your visit.
- **Prevent health care fraud** — we can better ensure that nobody else tries to use your information or medical insurance to seek medical care.

Having your picture taken is optional. We appreciate your kokua in supporting The Queen's Health Systems in providing the best quality health care in Hawaii.
