

SPEAKING OF HEALTH

A FREE VIRTUAL HEALTH AND WELLNESS EVENT

FOCUSED ULTRASOUND

A New Treatment for Tremor

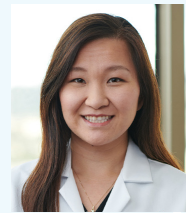

THURSDAY, APRIL 18

LIVE WEBINAR 12:00 PM – 1:00 PM

Tremor is a debilitating symptom of essential tremor and Parkinson's disease, which are the most common movement disorders. Tremor can be very disabling and affect people's day-to-day function. Current treatments are limited in efficacy or require drastic measures, such as surgery.

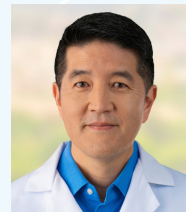

Join **Drs. Fay Gao and Michon Morita** to learn about a new treatment for tremor that utilizes cutting-edge technology to provide substantial tremor relief, with minimal risks and side effects.

They will present initial outcomes of this procedure.

Fay Gao, MD
