The Queen's Medical Center

West Hawai'i Project

Building the Future of Health Care on Hawai'i Island

Keeping Care Local

Our vision is to bring surgeons and other physicians to West Hawai‘i, so you have access to advanced care near home.

West Hawai‘i is one of the fastest-growing regions in the state, yet many residents still face barriers to accessing specialty and inpatient care. Patients often travel to O‘ahu for advanced treatment, placing additional emotional, financial, and logistical burdens on families.

Project site outlined in red.

A Statewide Health System

The Queen’s Medical Center – West Hawai‘i project is part of The Queen’s Health Systems, the largest private nonprofit health care system in the state.

With more than 9,400 employees and over 1,400 physicians and providers, Queen’s delivers care through a clinically integrated network of hospitals, clinics, and care sites across Hawai‘i and the Pacific.

As part of this statewide system, the West Hawai‘i campus will expand access to specialty and inpatient services while ensuring coordinated, high-quality care close to home.

A Regional Health Care Campus

A long-term investment in the future of health care on Hawai‘i Island.

The Queen’s Medical Center – West Hawai‘i project includes a planned 32-acre health care campus in West Hawai‘i near Honokōhau in Kailua-Kona.

The campus is being thoughtfully designed to support expanded health care access, future growth, and long-term community needs.

Acute Care Hospital
A Queen’s-owned and operated acute care hospital designed to expand inpatient and specialty care access for West Hawai‘i residents.

Outpatient Care Center (OCC)
An adjacent outpatient care center developed through a public-private partnership involving Kona Community Hospital, Ali‘i Health Center, and the State of Hawai‘i. The $100 million OCC will help support coordinated outpatient and specialty services for the region.

Workforce Housing
Approximately 150 workforce housing units are planned for the upper campus to support health care workforce recruitment and retention in West Hawai‘i.

Queen’s North Hawai‘i Community Hospital
Located in Kamuela, QNHCH is part of this regional health system, providing comprehensive care to Hawai‘i Island communities and playing a vital role in delivering coordinated, high-quality services across the region.

Rooted in Hawai‘i

Designing with community, culture, and place in mind.

Planning for the Kona Campus has been shaped by conversations with cultural practitioners, community members, and local leaders, along with firsthand experiences across the ahupua‘a — from mauka to makai.

These perspectives helped guide a vision rooted in healing, connection, stewardship, and deep respect for Honokōhau and the land itself. Every step of the planning process has centered on an important principle: designing with the land, not against it.

Project Progress

Planning and development are underway for The Queen’s Medical Center – West Hawai‘i project, representing an estimated $680 million investment in health care access and community well-being on Hawai‘i Island.

Key milestones include:

- Ferraro Choi + HOK selected as project architects
- Archaeological review completed
- Water credits secured
- Wastewater infrastructure work underway with Lanihau Properties
- Site planning and early design work in progress

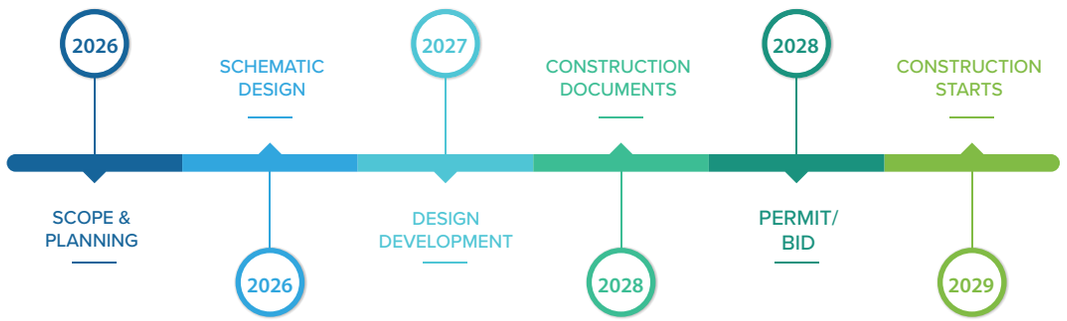

Funding Progress

- Initial $50 million in state funding support included in the 2026–2027 budget for the planned Outpatient Care Center (OCC) partnership
- $30 million has been committed to finalize design and construction documents
- Additional phased funding anticipated in future fiscal years

Current Planning Targets*

- Approximately 68 beds
- Estimated opening: 2031

**Subject to ongoing planning, regulatory review, and project development.*
